Author Data, made better together

Our new Author Search, Author Records and feedback functionality make it easier for you to find papers authored by your researchers, and submit feedback to curate an author's publication record in the *Web of Science Core Collection*.

Combining your feedback with our ongoing improvements of these tools, we are committed to providing the industry's highest-quality, reliable and most complete author data – supporting confident discovery of an author's published work, as well as assessment of their output and associated impact.

AUTHOR SEARCH BETA

1. Click on **Author Search** to begin a guided search for author records associated with an author name.
2. Enter an author's last and first names. You may enter alternative names to account for name changes or other variations. Click **Include alternative name** to create additional search rows.
3. Alternatively, search by Web of Science ResearcherID or ORCID identifier

4. If the name is very common, filters will appear for country and institution to help narrow the search.

Author Records

Author records are groups of publications that are likely by one person. They are created with a combination of artificial intelligence and human curated data. The algorithm uses over 40 data features, including name matching, affiliation, citation behavior and co-authorship patterns, combined with *Web of Science ResearcherID* and ORCID identifiers, plus direct feedback from the Web of Science community.

Improve this author record
Correct the record with our new feedback interface to combine author records and remove publications that don't belong.

1. Claim your author record to Publons, which creates a Web of Science ResearcherID number and can connect to ORCID.
2. If you know this author, submit feedback to identify the publications that belong to this author record.

Improve this author record

Correct the record with our new feedback interface to combine author records and remove publications that don't belong.

1. Select the author records that contain documents by the same author. Use the checkboxes to select.
2. Click **View Combined Record** to see the combined author records.
3. If you are the author claim the combined record as yours. If you aren't the author, provide feedback to help identify the correct publications and improve the author's data.

Profiles on Publons

Claimed author records are managed by each author through their public *Publons* profile. *Publons* is a complete view of a researcher's scholarly contributions including publication and citation data plus peer review and editorial work.
